Objective:

To develop a system that helps businesses track product inventory and manage stock efficiently.

Tools Used

- Python Flask
- HTML
- CSS
- JavaScript
- SQLite

Modules

- Product Management
- Inventory Tracking
- Delete Product
- Product Listing

Advantages

- Easy stock management
- Simple user interface
- Faster inventory tracking

Conclusion

The Inventory Management System simplifies the process of tracking products and managing stock levels. It helps reduce manual errors and improves efficiency in inventory handling.
